

PHILLIP LEHN, ARCHITECT / LEED AP

September 2010 / Page 1

PROFESSIONAL OBJECTIVE:

To help create useful, technically and cost appropriate, and aesthetically inspiring buildings and open spaces that help to protect, preserve, and sustain our natural environment through multi disciplinary collaborations of dedicated, knowledgeable, and intellectually stimulating individuals who respect each other and enjoy working together.

DESIGN PHILOSOPHY:

A patient search without preconception to better understand client, site, program, budget, legal requirements, historic precedents, ecological imperatives, appropriate technologies, and aesthetic opportunities so that the project's many elements are brought together as a balanced whole and made manifest with an economy of means, a brilliant and inspiring presence, and an elegant sense of inevitability.

ARCHITECTURAL REGISTRATIONS & ACCREDITATION

State of Washington 1979 - present

Commonwealth of Massachusetts 1973 - 1981

Leadership in Energy and Environmental Design - New Construction, Accredited Professional / LEED-NC, AP 2009

PROFESSIONAL EDUCATION & SCHOLARSHIPS

College of Architecture and Urban Planning, University of Washington Seattle, WA - Bachelor of Architecture 1969

American Institute of Architects Seattle Scholarship and the National Foundation for the Arts & Humanities Scholarship
